

What is claimed is:

1. A resin composition for forming sheets for ink printing comprising from 30 to 90% by weight of an ink-absorbent resin (A) and from 70 to 10% by weight of an ink-unabsorbent resin (B).

2. The resin composition according to claim 1, wherein the ink-absorbent resin (A) is an amorphous resin.

3. The resin composition according to claim 1, wherein the ink-absorbent resin (A) has an SP value of at least 8.5.

4. The resin composition according to claim 1, wherein the ink-absorbent resin (A) is an amorphous resin having an SP value of at least 8.5.

5. The resin composition according to claim 4, wherein the ink-absorbent resin (A) is a styrene-based resin.

6. The resin composition according to any one of claims 1-5, wherein the ink-unabsorbent resin (B) is an olefin-based resin.

7. A sheet for ink printing having an ink receiving layer, wherein the ink receiving layer is a layer of the resin composition according to claim 1.

8. The sheet according to claim 7, the sheet comprising the ink receiving layer, a support layer, a pressure-sensitive adhesive layer and a release paper sheet

disposed in this order.

9. The sheet according to claim 7, the sheet further comprising a fibrous substrate layer.
